

Alabama | Federal Rental Assistance Facts

About 30 percent of all Alabama households – or 563,426 households – are renters. Federal rental assistance programs enable more than 94,824 low-income households in Alabama to rent modest housing at an affordable cost. About 48 percent of these households are headed by people who are elderly or have disabilities; approximately 44 percent are families with children.

Yet federal programs reach only a small share of the low-income Alabama households that pay unaffordable rental housing costs and are therefore at increased risk of homelessness and other types of housing instability:

- In Alabama, 136,598 low-income renter households pay *more than half* their monthly cash income for housing costs. On average, these households have incomes of \$725 and pay housing costs of \$667, leaving only \$58 to pay for other necessities. About 39 percent of these cost-burdened renters are elderly or people with disabilities, while 28 percent are families with children.
- When housing costs consume more than half of household income, low-income families are at greater risk of becoming homeless. Point-in-time surveys suggest that at least 6,080 people are homeless in Alabama.

Idaho | Federal Rental Assistance Facts

About 28 percent of all Idaho households – or 158,427 households – are renters. Federal rental assistance programs enable more than 15,193 low-income households in Idaho to rent modest housing at an affordable cost. About 69 percent of these households are headed by people who are elderly or have disabilities; approximately 32 percent are families with children.

Yet federal programs reach only a small share of the low-income Idaho households that pay unaffordable rental housing costs and are therefore at increased risk of homelessness and other types of housing instability:

- In Idaho, 34,449 low-income renter households pay *more than half* their monthly cash income for housing costs. On average, these households have incomes of \$883 and pay housing costs of \$700, leaving only \$183 to pay for other necessities. About 25 percent of these cost-burdened renters are elderly or people with disabilities, while 34 percent are families with children.
- When housing costs consume more than half of household income, low-income families are at greater risk of becoming homeless. Point-in-time surveys suggest that at least 1,939 people are homeless in Idaho.

Mississippi | Federal Rental Assistance Facts

About 31 percent of all Mississippi households – or 334,964 households – are renters. Federal rental assistance programs enable more than 61,493 low-income households in Mississippi to rent modest housing at an affordable cost. About 45 percent of these households are headed by people who are elderly or have disabilities; approximately 49 percent are families with children.

Yet federal programs reach only a small share of the low-income Mississippi households that pay unaffordable rental housing costs and are therefore at increased risk of homelessness and other types of housing instability:

- In Mississippi, 78,974 low-income renter households pay *more than half* their monthly cash income for housing costs. On average, these households have incomes of \$683 and pay housing costs of \$660, leaving only \$23 to pay for other necessities. About 32 percent of these cost-burdened renters are elderly or people with disabilities, while 40 percent are families with children.
- When housing costs consume more than half of household income, low-income families are at greater risk of becoming homeless. Point-in-time surveys suggest that at least 2,797 people are homeless in Mississippi.

Ohio | Federal Rental Assistance Facts

About 32 percent of all Ohio households – or 1,437,923 households – are renters. Federal rental assistance programs enable more than 224,806 low-income households in Ohio to rent modest housing at an affordable cost. About 52 percent of these households are headed by people who are elderly or have disabilities; approximately 38 percent are families with children.

Yet federal programs reach only a small share of the low-income Ohio households that pay unaffordable rental housing costs and are therefore at increased risk of homelessness and other types of housing instability:

- In Ohio, 347,734 low-income renter households pay *more than half* their monthly cash income for housing costs. On average, these households have incomes of \$758 and pay housing costs of \$695, leaving only \$63 to pay for other necessities. About 41 percent of these cost-burdened renters are elderly or people with disabilities, while 28 percent are families with children.
- When housing costs consume more than half of household income, low-income families are at greater risk of becoming homeless. Point-in-time surveys suggest that at least 12,700 people are homeless in Ohio.

Washington | Federal Rental Assistance Facts

About 36 percent of all Washington households – or 916,270 households – are renters. Federal rental assistance programs enable more than 85,172 low-income households in Washington to rent modest housing at an affordable cost. About 69 percent of these households are headed by people who are elderly or have disabilities; approximately 29 percent are families with children.

Yet federal programs reach only a small share of the low-income Washington households that pay unaffordable rental housing costs and are therefore at increased risk of homelessness and other types of housing instability:

- In Washington, 201,957 low-income renter households pay *more than half* their monthly cash income for housing costs. On average, these households have incomes of \$1,041 and pay housing costs of \$920, leaving only \$121 to pay for other necessities. About 38 percent of these cost-burdened renters are elderly or people with disabilities, while 27 percent are families with children.
- When housing costs consume more than half of household income, low-income families are at greater risk of becoming homeless. Point-in-time surveys suggest that at least 22,782 people are homeless in Washington.
