## NATIONAL EFFECTS OF CUTS IN HOUSING VOUCHER ASSISTANCE IN 2005

### National Summary of State Totals

The table shows state summaries of voucher estimates based in part on data that housing agencies reported to HUD covering the period through July 2004. The funding figures in the column “Voucher renewal funding allocated by HUD” are based on HUD data on funding awards to individual agencies in the state. We estimated the number of expiring vouchers available with the allocated funds based on agency data on voucher costs in mid-2004 inflated by the applicable HUD annual adjustment factor. Agencies’ actual voucher costs in 2005 may be more or less than the estimate.

The column “vouchers cut in 2005” is the number of vouchers the appropriations act directs HUD to fund — authorized vouchers in use in May – July 2004 plus any additional vouchers issued to replace other federal housing subsidies that need renewal funding in 2005 — that are unfunded due to the appropriations shortfall. If the estimated “vouchers cut in 2005” is less than the total number of expiring vouchers not funded, it is likely that some agencies in the state were not using all of their vouchers in mid-2004. The number of vouchers in use in February 2005 that are not funded may be less than the estimates provided if the agencies in a state on average are using fewer vouchers than in mid-2004 or if average per unit costs have declined substantially. The number of vouchers in use that are not funded may be more than the estimates provided if the average per unit cost for agencies in the state is currently greater than the estimate.

Agencies may be able to remedy a funding shortfall through use of reserve funds (if accessed quickly) or other policy changes, rather than by reducing the number of families receiving voucher assistance.
