- In 2009, California used 51% of its state and federal TANF funds on Basic Assistance.
- The monthly grant for a family of three in California was \$694 in 2010, 16% lower than in 1996 after adjusting for inflation.

## Number of Families with Children in Poverty, Deep Poverty and TANF Cases

Beginning in 2006, this analysis uses TANF caseload data collected directly from state agencies rather than the official data reported by HHS in order to more consistently reflect the number of families receiving cash welfare in each state over time. Unlike the HHS data, these data include solely state-funded programs, and exclude worker supplement programs.

Deep Poverty refers to families below half the poverty line. Shading in graph shows the 90% confidence interval (lower and upper bound) of poverty estimates. Two years of Current Population Survey (CPS) data were merged to improve reliability. For example, Dec-08 represents merged CPS poverty data for calendar years 2008 and 2009.
