

The Supplemental Nutrition Assistance Program (SNAP) is the nation's most important anti-hunger program.

Whom Does SNAP Reach?

In Fiscal Year 2017, it reached:

- **89,000** Alaska residents, or **12%** of the state population (**1 in 8**)
- **42,000,000** participants in the United States, or **13%** of the total population (**1 in 8**)

ALASKA	more than 73% of SNAP participants are in families with children	almost 26% are in families with members who are elderly or have disabilities	more than 42% are in working families
NATIONALLY	more than 68% of SNAP participants are in families with children	more than 31% are in families with members who are elderly or have disabilities	more than 44% are in working families

Many Alaska households struggle to put food on the table. The most recent data show:

- **12.7%** of households were “food insecure,” or struggled to afford a nutritionally adequate diet.
- **9.9%** of the population lived below the poverty line.
- **13.8%** of children lived below the poverty line.
- **4.2%** of elderly lived below the poverty line.

SNAP reaches needy populations: 87% of eligible individuals participated in SNAP in Alaska in 2015, and **70%** of eligible workers participated.

SNAP kept **21,000** people out of poverty in Alaska, including **11,000** children, per year between 2009 and 2012, on average. (These figures adjust for households' underreporting of benefits.)

What Benefits Do SNAP Recipients Receive?

SNAP targets benefits according to need. Very poor households receive more SNAP benefits than households closer to the poverty line since they need more help affording an adequate diet. SNAP recipients in Alaska received \$191 million in benefits in 2017.

Average monthly SNAP benefit for each household member:

How Does SNAP Benefit the Economy?

Moody's Analytics estimates that in a weak economy, \$1 in SNAP benefits generates \$1.70 in economic activity. Households receive SNAP benefits on electronic benefit transfer (EBT) cards, which can be used only to purchase food at one of the 263,100 authorized retail locations around the country, including 600 in Alaska.

Note: Due to a higher cost of living, Alaska has different eligibility, deduction, and benefit levels than the continental U.S. Alaskan SNAP participation declines annually following the increase in income residents experience from the receipt of dividends from the Alaska Permanent Fund.

In addition to SNAP, in FY 2017, based on preliminary data, an average of about 700 individuals in Alaska received benefits through the Food Distribution Program on Indian Reservations (FDPIR), which is a federal program that provides commodity foods to low-income households, including the elderly, living on Indian reservations, and to Native American families residing in designated areas near reservations and in the State of Oklahoma.
