

The Supplemental Nutrition Assistance Program (SNAP) is the nation’s most important anti-hunger program.

Whom Does SNAP Reach?

In Fiscal Year 2019, it reached:

- **85,000** Alaska residents, or **12%** of the state population (**1 in 9**)
- **38,000,000** participants in the United States, or **12%** of the total population (**1 in 9**)^a

ALASKA	more than 70% of SNAP participants are in families with children	more than 26% are in families with members who are elderly or have disabilities	more than 43% are in working families
NATIONALLY	more than 67% of SNAP participants are in families with children	almost 34% are in families with members who are elderly or have disabilities	more than 43% are in working families

Most SNAP Participants in Alaska Are Poor

Share of participants by household income, FY 2018

Source: CBPP analysis of FY 2018 USDA SNAP Household Characteristics data

Many Alaska households struggle to put food on the table. The most recent data show:

- **10.8%** of households were “food insecure,” or struggled to afford a nutritionally adequate diet.
- Median income was **4.8% below** the 2007 level, after adjusting for inflation.
- **10.9%** of the population lived below the poverty line.
- **14.1%** of children lived below the poverty line.
- **6.7%** of elderly lived below the poverty line.

SNAP reaches needy populations: **71%** of eligible individuals participated in SNAP in **Alaska** in 2016, and **59%** of eligible workers participated.

SNAP kept **22,000** people out of poverty in **Alaska**, including **10,000** children, per year between 2013 and 2016, on average. (These figures adjust for households’ underreporting of benefits.)

^a Due to data-reporting issues, 2019 SNAP participation data for North Carolina are not available from the Department of Agriculture. This national participation total was calculated using SNAP caseload data from the North Carolina Department of Health & Human Services, and was adjusted to account for the early issuance nationwide of February 2019 SNAP benefits in January 2019.

What Benefits Do SNAP Recipients Receive?

SNAP targets benefits according to need. Very poor households receive more SNAP benefits than households closer to the poverty line since they need more help affording an adequate diet. SNAP recipients in Alaska received \$171.09 million in benefits in 2019.

Fiscal Year 2019

Average monthly SNAP benefit for each household member:

\$181

Average SNAP benefit per person per meal:

\$1.84

How Does SNAP Benefit the Economy?

Moody's Analytics estimates that in a weak economy, \$1 in SNAP benefits generates \$1.70 in economic activity. Households receive SNAP benefits on electronic benefit transfer (EBT) cards, which can be used only to purchase food at one of about 247,600 authorized retail locations around the country, including some 500 in Alaska.

Notes: Due to a higher cost of living, Alaska has different eligibility, deduction, and benefit levels than the continental U.S. Alaskan SNAP participation declines annually following the increase in income residents experience from the receipt of dividends from the Alaska Permanent Fund. In addition to SNAP, in FY 2019, based on preliminary data, an average of about 600 individuals per month in Alaska received benefits through the Food Distribution Program on Indian Reservations (FDPIR) which is a federal program that provides commodity foods to low-income households, including the elderly, living on Indian reservations, and to Native American families residing in designated areas near reservations and in the State of Oklahoma.
