## Federal TANF Allocation and State Maintenance-of-Effort (MOE) Amounts

- In 2021 Delaware was awarded its TANF block grant of \$32 million and an additional \$4 million in contingency funds.
- Since unspent block grant funds can be carried over to future years, a state may spend more or less than its annual block grant allocation in any given year. As of 2021, Delaware has accumulated \$45 million in unspent TANF block grant funds, equal to 139 percent of its block grant.
- Every year each state must also spend, from its own funds, at least 80 percent of its historical spending on low-income families with children. (A state may spend more than its minimum.) This “MOE” requirement can be reduced to 75 percent if a state meets specific work participation rate requirements. In 2021 Delaware met these requirements and was subject to the 75 percent MOE obligation.
