## Federal TANF Allocation and State Maintenance-of-Effort (MOE) Amounts

- In 2019, Maine was awarded a reduced TANF block grant of \$77 million. The block grant was reduced due to a federal penalty for failure to meet the work participation rate in 2007.
- Since unspent block grant funds can be carried over to future years, a state may spend more or less than its annual block grant allocation in any given year. As of 2019, Maine has accumulated \$128 million in unspent TANF block grant funds, equal to 167 percent of its block grant.
- Every year each state must also spend, from its own funds, at least 80 percent of its historical spending on poor families with children. (A state may spend more than its minimum.) This “MOE” requirement can be reduced to 75 percent if a state meets specific work participation rate requirements. In 2019, Maine met these requirements and was subject to the 75 percent MOE obligation.
