

Nevada TANF Spending

In 2017, Nevada spent about **\$102 million in federal and state funds** under the Temporary Assistance for Needy Families (TANF) program. **It spent 59 percent of these funds on core activities**, which include basic assistance, work activities and supports, and child care. In 2017, Nevada spent below average among states on work activities to help poor families find jobs.

TANF Provides a Safety Net for Few Poor Families

In 2017, for every 100 poor families with children in Nevada, only 22 received TANF cash assistance, down from 30 in 2001. During that time, Nevada slashed its spending on work activities to help poor families find and keep jobs, even as the number of families with children below 50 percent of the poverty line more than doubled.

Federal TANF Allocations and State Maintenance of Effort (MOE) Requirements

- The annual federal TANF block grant has been frozen since its creation and lost about a third of its value between 1997 and 2017 due to inflation.
- Since unspent block grant funds can be carried over to future years, a state may spend more or less than its federal block grant allocation in any given year. In 2017, Nevada spent \$40 million in federal TANF funds.
- Every year each state must also spend, from its own funds, at least 80 percent of its historical spending on poor families with children. (In some cases, this “MOE” requirement can be reduced to 75 percent.) In 2017, Nevada claimed \$62 million in MOE spending.

The CBPP analysis of families in poverty and deep poverty uses data from Census' Current Population Survey. The individual years CBPP uses to describe caseloads, poverty and deep poverty trends represent two-year averages; for example, '2017' represents the average for '2016-2017.'
